

Table 1: Measurements of masses and widths for excited  $D$  mesons. The column  $J^P$  lists the most significant assignment of spin and parity. If possible, an average mass or width is calculated. Table 1/2 for  $D$  mesons.

| Resonance         | $J^P$              | Decay mode              | Mass [MeV/ $c^2$ ]               | Width [MeV]                    | Measured by                              | Reference |
