

Table 1: Direct experimental measurements of $\phi_s^{c\bar{s}s}$ and, wherever applicable, $\Delta\Gamma_s$ using $J/\psi K^+K^-$, $\psi(2S)K^+K^-$, $J/\psi\pi^+\pi^-$ and $D_s^+D_s^-$ decays. The first error is due to statistics, the second one to systematics. The last (last but one) line gives our averages, where the $\Delta\Gamma_s$ uncertainties have been multiplied by 1.60 (1.51) to account for inconsistencies between the $B_s^0 \rightarrow J/\psi K^+K^-$ measurements. Only solution (a) of Ref. [1] is used.
